

Energy Saving & Carbon Reduction

Fan Coil Unit Control System Solution

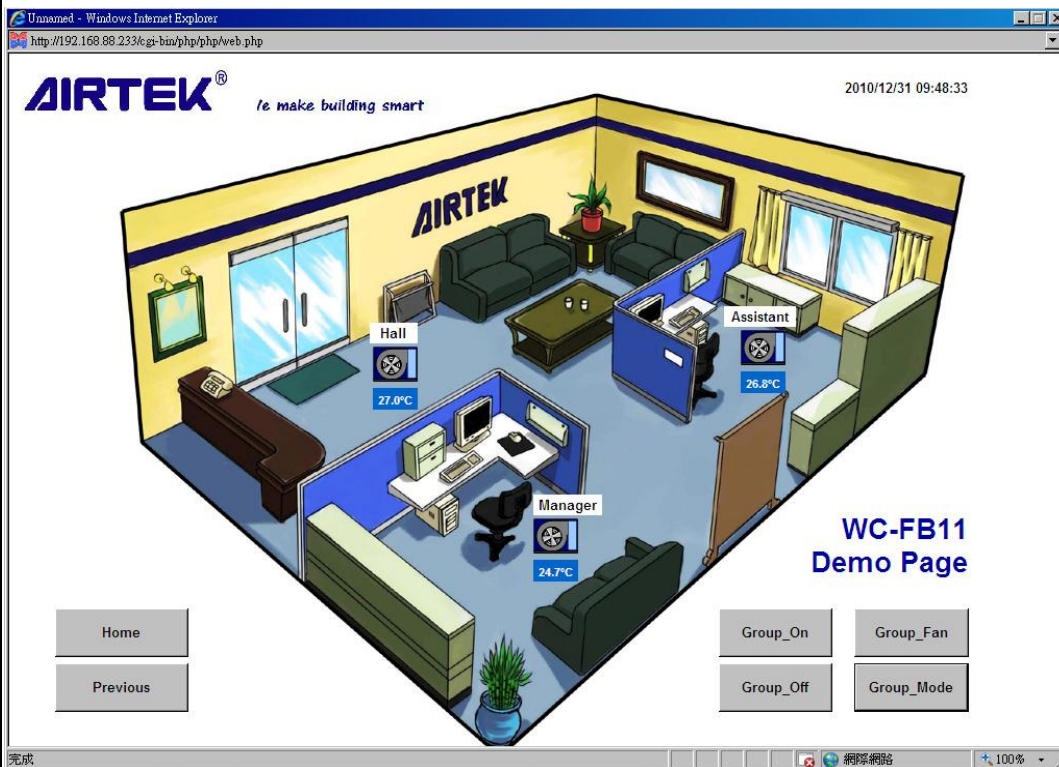

AIRTEK®
We make buildings smart.

WEB Page Embedded Fan Coil Unit Control System

WEB page embedded fan coil unit controller WC-FB11 and WC-FB13 store multiple control pages inside. User can access these web pages to control the system from a remote location with internet browser by using a 3C device such as desktop PC, notebook (NB), tablet (iPad), smart phone (iPhone, HTC) etc.. These timely and efficiently control are benefits to make Energy Saving and Carbon Reduction come true.

An Embedded Web Page

Browser

- IE, Fire fox
- Google (chrome)
- Apple(safari)
- Opera, Android

3C Device

- PC,NB
- Tablet
- Smart phone

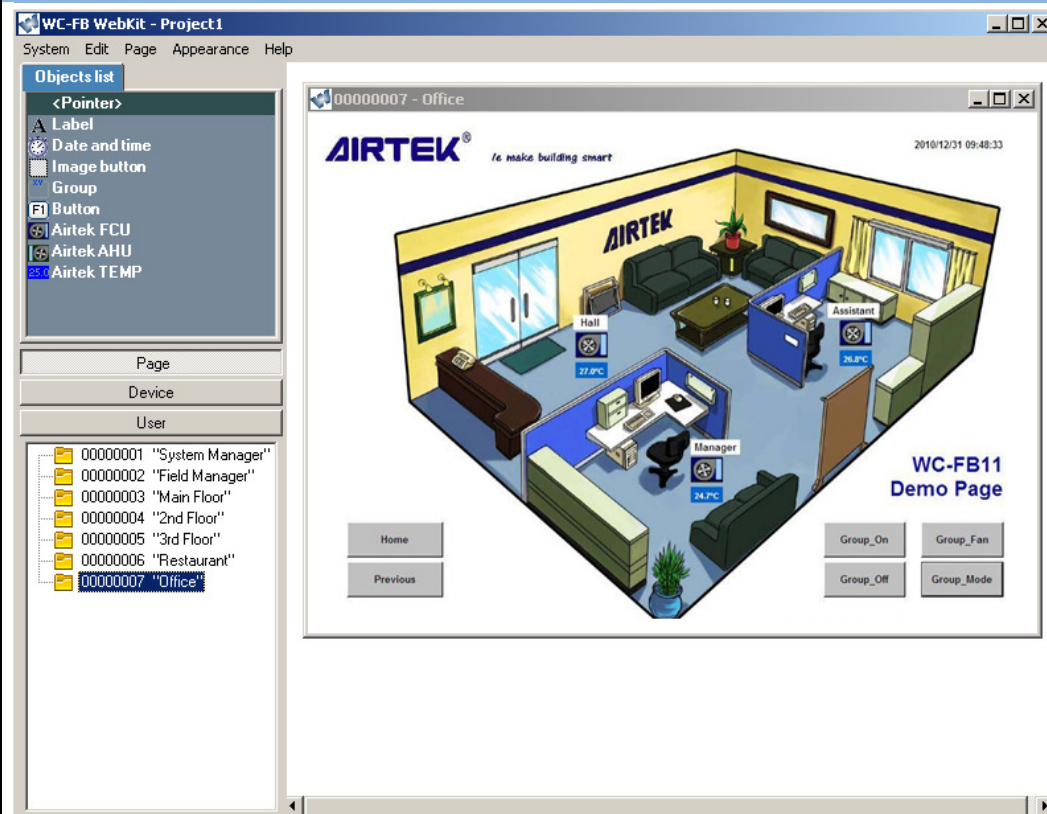

Software function

- User password
- Group control
- Unitary control
- Timer
- Weekly schedule
 - Event
 - Energy saving
- Daily schedule
- Alarm message
 - Occupy/Unoccupy
 - Sleep mode
- Advance parameter
 - Time synchronism
 - Running information

AIRTEK WebKit – Web Page Embedded Development Software

Airtek provides a free web page embedded development software – WebKit. User can edit, debug, upload, and download web pages online with an internet browser. It has selectable standard function icon for user to save time to edit and test web pages. Multiple pages setting and jump between these pages are available. User can change layout and function setting of web pages online anytime.

Program Edit Screen

Computer requirements

- 2 GHz minimum
- 512 MB RAM
- 36+ GB HD
- Ethernet (10/100Mbps)
- Window XP or VISTA or Window 7

Development function

- System password setting
 - Administrator
 - All
 - Group
- IP address setting
- Web page management
- User group select
- Web page edit
- Software function block
- Device module standardize
- Background remittance
- Web page upload/download
- Device group select
- Logical programming
- Program upload/download
- Language select
- Advance parameter setting
- Project management

HARDWARE

NAME		BACnet Web Embedded FCU Controller		Modbus to BACnet Protocol Interface		Modbus to Modbus Protocol Interface		MOUBUS PID Temperature Controller
